

Mountain/Canyon Flying--What You Need to Know Before You Go

Mountain flying can be a lot of fun but it can also pose challenges that can put the unfamiliar pilot in an uncomfortable situation. Lori MacNichol, founder and owner of McCall Mountain/Canyon Flying Seminars, will give strategies and tips for flying in the back country and across the mountains. Learn how to prepare for the trip, turn radius vs. airspeed, backcountry take off procedures, using topography cues for flight, weather unique to canyons and mountains, and how to account for the effects of density altitude, plus much more information that you can apply immediately to your next cross country trip.

Directions: From Hwy 240 take Columbia Center Blvd. Head south. Red Lion is on corner of Quinault and Columbia Center Blvd.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
